

Questions:

1. Find the differences

Answer = 10

2. Number of cultural clubs = 7.
3. Best club in IIIT Dharwad (wink wink)

4.

Ans->Time

5. Example 2: $A + B$ means B is the brother of A.
6. $A \times B$ means B is the husband of A.

$A - B$ means A is the mother of B.

$A \% B$ means A is the father of B.

How is Q related to T from the expression "Q-P+R%T"?

(A) Grandmother {ANSWER} (B) Mother (C) Aunt (D) Niece

In a certain code language,

'A + B' means 'A is the mother of B'

'A - B' means 'A is the brother of B'

'A × B' means 'A is the wife of B'

'A ÷ B' means 'A is the father of B'

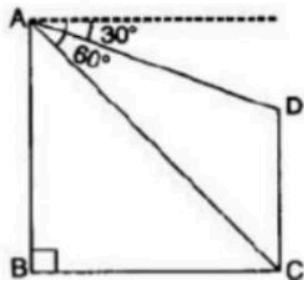

Based on the above, how is C related to M if 'C+V÷R×N-M'?

1. Brother's wife's father's father
2. Brother's wife's father's brother
3. Brother's wife's mother's father
4. Brother's wife's mother's brother

7.

Answer 3

11. In the figure given, from the top of a building AB = 60 m high, the angles of depression of the top and bottom of a vertical lamp post CD are observed to be 30° and 60° respectively. Find:

(i) The horizontal distance between AB and CD.

(ii) The height of the lamp post. [4]

[2013]

8.

Answer = 40

9. Some months have 31 days, others have 30. How many have 28? Ans: 12

10. Answer is the ascii value of '?' = 63

$$\text{🍕} + \text{🍔} + \text{🌭} = 40$$

$$\text{🍕} - \text{🍔} + \text{🌭} = 20$$

$$\text{🍕} - \text{🍔} - \text{🌭} = 0$$

@prof.brunoras

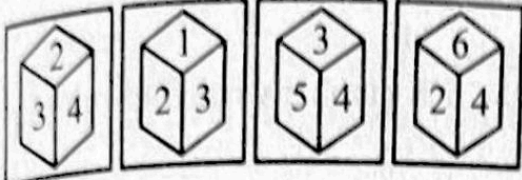

$$\int_{\text{🍔} - \text{🌭}}^{\infty} \frac{\text{🍕} * \sin(\text{🤔})}{\text{🍔} * \text{🤔}} d\text{🤔} = ?$$

11. How many clocks are there at the entrance of PI block in the college = 4

12. What is today's wordle answer = haven

13.

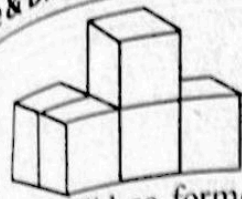

1. A dice is thrown four times and its four different positions are given below. Find the number on the face opposite the face showing 2.

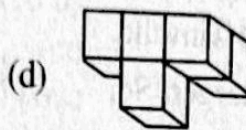

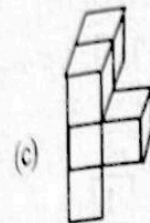

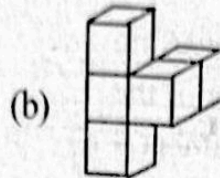

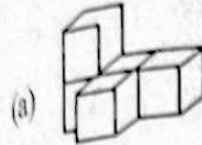

(a) 4 (b) 5
(c) 6 (d) 3

1. (b) 1, 3, 4 and 6 are adjacent 2.
Therefore number 5 on the
face opposite to 2.

14. How many times do we get paneer in the mess? Follow up with the Easter egg

The solid so formed by joining unit cubes is rotated to obtain different positions, which of these cannot be the shape after it has turned?

15.

Ans is B

16. What is Giga Chad's name: SOIn: Giga Chad. False ans: Ernest Khalimov

17. Which professor has a lecture in C403 on Tuesdays 15:40? = Prakash Pawar or DrPrakashPawar

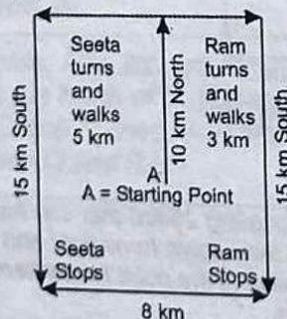

Illustration 13:

Seeta and Ram both start from a point towards North. Seeta turns to left after walking 10 km. Ram turns to right after walking the same distance. Seeta waits for some time and then walks another 5 km, whereas Ram walks only 3 km. Then both of them return to their respective South and walk 15 km forward. How far is Seeta from Ram?

- (A) 15 km
(C) 8 km

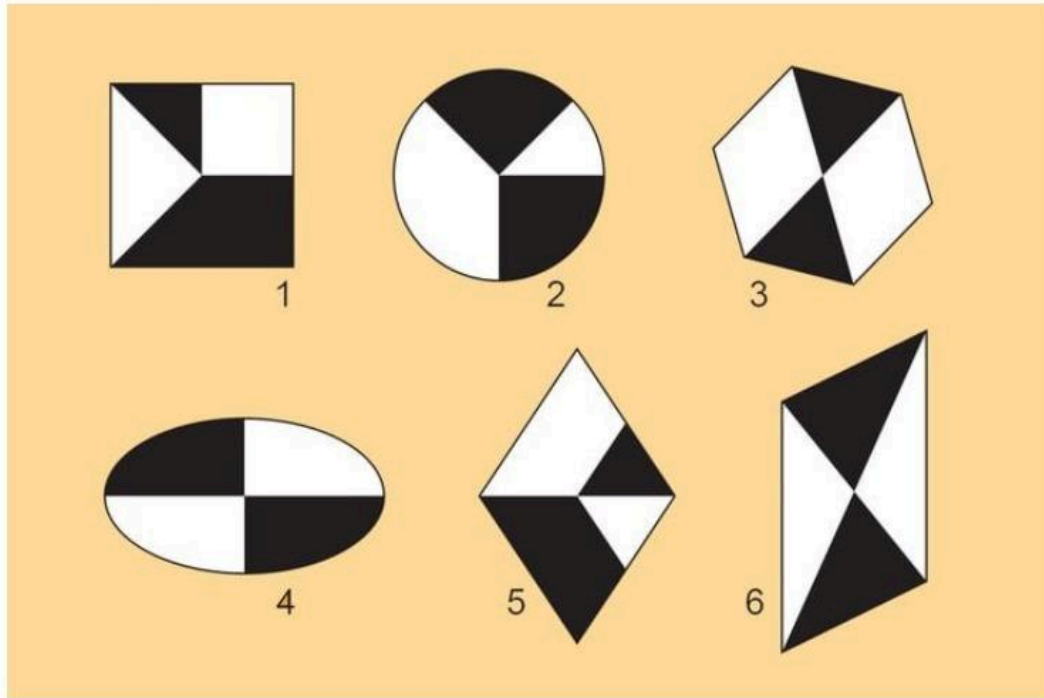

- (B) 10 km
(D) 12 km

Solution: (C)

18.

Shaping

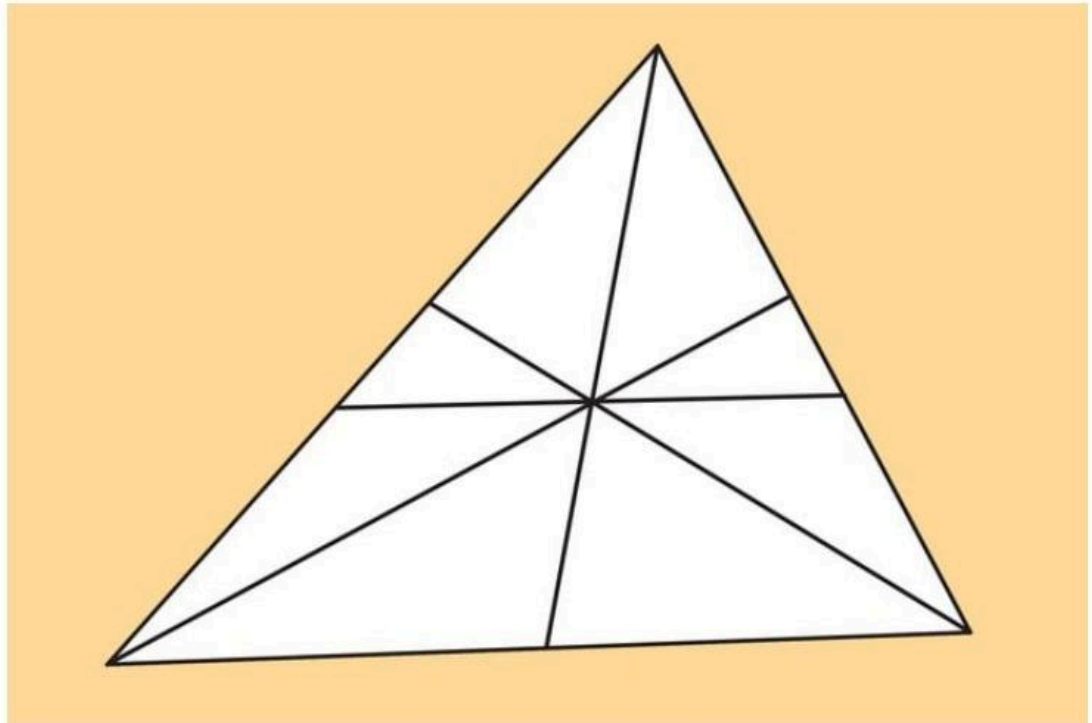

BRAINSNACK

Which shape (1-6) contains more white than black?

Answer: Shape 3. All the others contain equal portions of each.

Tricky triangles

BRAINSNACK

How many triangles can you see?

Answer: 23

20.

Hint : the answer is greater than 10

21. Choose a random path. Regardless of the question.

22. If 'cages' are called 'rockets', 'rockets' are called 'traps', 'traps' are called 'planets', 'planets' are called 'aeroplanes', 'aeroplanes' are called 'cycles' and cycles' are called 'cars', what is Earth

(a) Cycles (b) Rockets (c) Planet (d) Aeroplanes (e) Cars

Sol. Earth is a planet and here planets are called aeroplanes. So, earth will be called aeroplanes.

Q33) What is the minimum number of different colours required to paint the given figure such that no two adjacent regions have the same colour?

23.

Ans = 3

24. Alan, Bob, Colin, Dave and Emily are standing in a circle. Alan is on Bob's immediate left. Bob is on Colin's immediate left. Colin is on Dave's immediate left. Dave is on Emily's immediate left. Who is on Alan's immediate right?

Z = 10, O = 25 ans = Paris

ans->venus.

Ans->Nh5+

Dead Branch Questions : (Completed questions highlighted in blue)

40. A MATTER OF TIME

Unscramble and solve it :

Yffit etunim oga fi ti saw ufor semit sa anym setunim taps reeth kcolc'o, woh anym setunim si ti litnu xis kcolc'o?

Fifty minutes ago if it was four times as many minutes past three o'clock, how many minutes is it until six o'clock?

Ans: 26 mins

41. BROTHERS AND SISTERS

A family I know has several children. Each boy in this family has as many sisters as brothers but each of the girls has twice as many brothers as sisters. How many brothers and sisters are there?

ANS: 4 boys & 3 girls

42. THE WEDDING ANNIVERSARY

Recently I attended the twelfth wedding anniversary celebrations of my good friends Mohini and Jayant. Beaming with pride Jayant looked at his wife and commented, 'At the time we were

married Mohini was $\frac{3}{4}$ of my age, but now she is only $\frac{5}{6}$ th. We began to wonder how old the couple must have been each at the time of their marriage! Can you figure it out?

Ans: Jayanthi: 24 Mohini: 18

43. BLOW HOT BLOW COLD

It is a matter of common knowledge that 0°C is the same as 32°F . It is also a known fact that 100°C equals 212°F . But there is a temperature that gives the same reading on both Centigrade and Fahrenheit scales. Can you find this temperature? Ans: -40

44. ANIMALS ON THE FARM

My friend who owns a farm near Bangalore has five droves of animals on his farm consisting of cows, sheep and pigs with the same number of animals in each drove. One day he decided to sell them all and sold them to eight dealers. Each of the eight dealers bought the same number of animals and paid at the rate of Rs. 17 for each cow, Rs. 2 for each sheep and Rs. 2 for each pig. My friend received from the dealers in total Rs. 301. How many animals in all did he have and how many of each kind?

Ans: 3 Cows, 8 sheep, 109 pigs

45. SQUARES AND RIGHT ANGLES

Minimum number of straight lines required to make 2 squares and 4 rightangled triangles

Ans: 8

46. THE SARI AND THE BLOUSE

I bought a shirt and a pant for Rs. 110 at the New Market. The shirt cost Rs. 100 more than the pant, how much does the shirt cost?

Ans: 105

47. THE OLD SHIP

Some years back I was travelling by a cargo ship from New Zealand to Tahiti. I was curious to look around the ship one day and in the boiler room I asked a man how old the ship was. He smiled and replied me in this way: 'The ship is twice as old as its boiler was when the ship was as old as the boiler is now. And the combined age of the ship and the boiler is thirty years.' Can you figure out what is the age of the ship and of the boiler?

Ans: (Ship = $120/7$, Boiler = $90/7$)

48.ON THE WAY TO MARKET

One morning I was on my way to the market and met a man who had 4 wives. Each of the wives had 4 bags containing 4 dogs and each dog had 4 puppies. Taking all things into consideration how many were going to market?

Ans: 1 - Myself

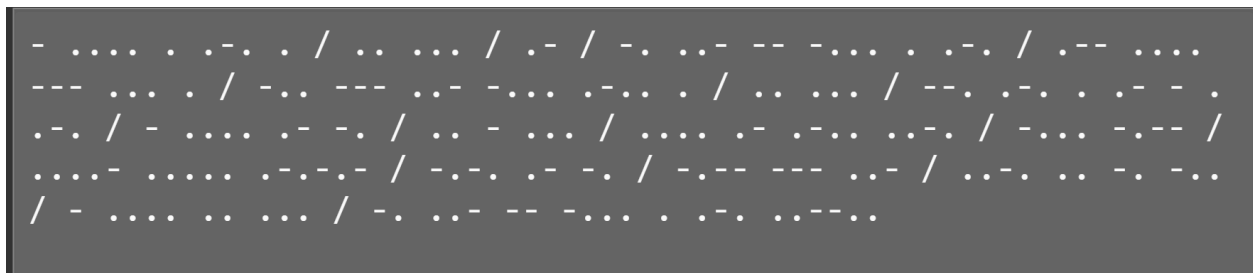

49.RIGHT FOOT FORWARD

A short man takes three steps to a tall man's two steps. They both start out on the left foot. How many steps do they have to take before they are both stepping out on the right foot together?

Ans: Never

50.THE SPECIAL NUMBER

There is a number whose double is greater than its half by 45. Can you find this number?

Ans: 30

51. SAWING THE TREE TRUNK

A heavy tree trunk can be sawed into a piece 12 ft long in one minute. How long will it take to saw it into twelve equal pieces?

Ans: 11 min

52.AT THE STORE

I entered a store and spent one-half of the money that was in my purse. When I came out I found that I had just as many paise as I had rupees and half as many rupees as I had paise when I went in. How much money did I have on me when I entered? Ans: 99.98

53. FATHER AND SON

A father, I know, is 4 times his son's age. And in 30 years the son will be half as old as his father. What is the combined age of father and son?

Ans: $60 + 15 = 75$

54. THE NUMBER PUZZLE

There are two numbers with the difference of 3 between them and the difference of their squares is 51. find the sum of those numbers

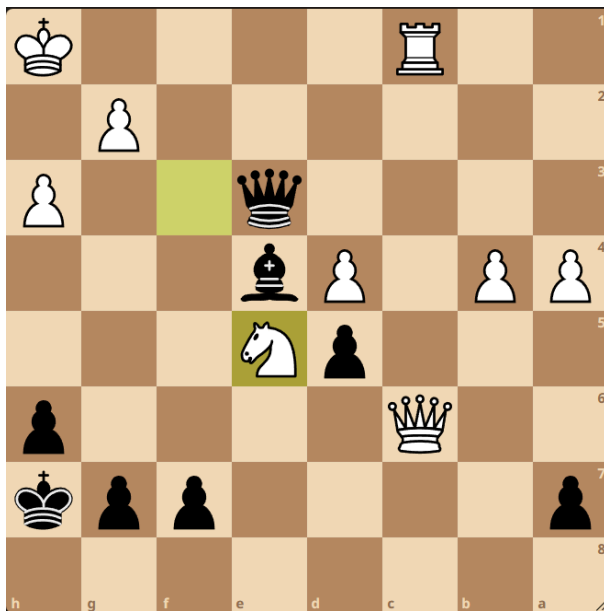

Ans: $(10, 7) = 17$

55. azelf

56. Clefairy

57. ANS: qhx3+

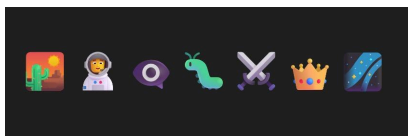

58. Ans: Anne frank

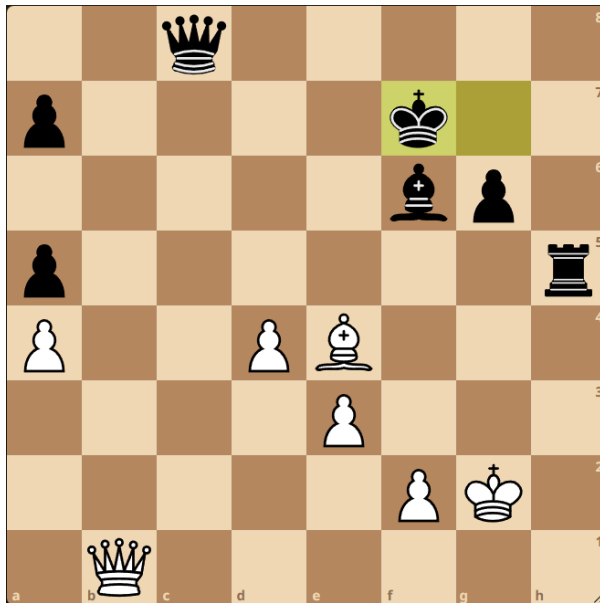

Who is the main person related to the image?

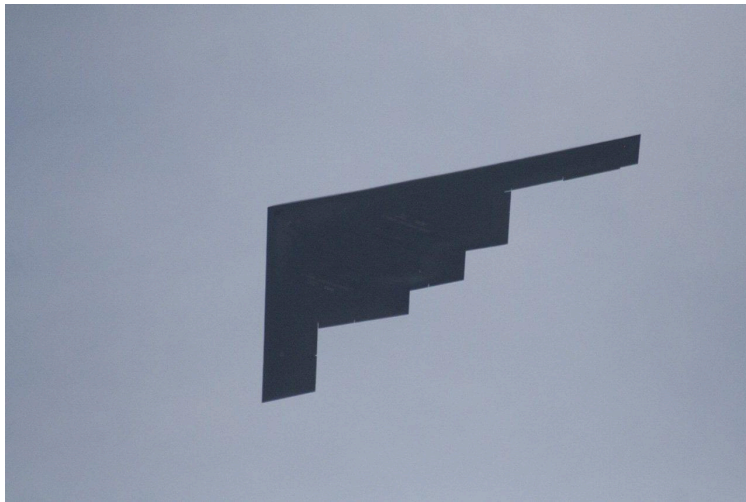

59. Dune movie:

61. B2 bomber

62. RRR movie:

63,64,65,66.

What is today?

Holiday

Game day

Workday

ans = workday

What season is it?

Summer

Fall

Spring

Winter

ans = summer

What can be expected tomorrow?

Rain

Celebration

Eclipse

Tsunami

ans = celebration

What type of business or industry drives the economy?

Industrial

Farming

Service

Tourism

ans = industrial

67.

```
keys = ["a", "b", "c"]
values = [1, 2, 3]
dictionary = {}
for i in range(len(keys)):
    dictionary[keys[i]] == values[i]
print(dictionary)
```

This code tries to create a dictionary from two lists but fails. Find the line with the error.

Ans = 5

68. What Python built-in function is used to transform elements of an iterable into a new iterable by applying a given function to each element? (just write the function name)

answer = map

69. What is the term for a programming paradigm that treats computation as the evaluation of

mathematical functions, avoiding changing state and mutable data?
answer : functional programming

70. repeated

```
keys = ["a", "b", "c"]
values = [1, 2, 3]
dictionary = {}
for i in range(len(keys)):
    dictionary[keys[i]] == values[i]
print(dictionary)
```

which line has error ? ans : 5

71.

```
1. def count_vowels(text):
2.     vowels = "aeiou"
3.     count = 0
4.     for ch in text:
5.         if ch in vowels:
6.             count = count + 1
7.     return count
8.
9. words = ["apple", "sky", "orange", "crypt"]
10. for w in words:
11.     print(w, "has", count_vowels(w.lower), "vowels")
```

which line has error ? ans : 11

```

1. class BankAccount:
2.     def __init__(self, name, balance=0):
3.         self.name = name
4.         self.balance = balance
5.
6.     def withdraw(self, amount):
7.         if amount > self.balance:
8.             print("Insufficient funds")
9.         else:
10.            self.balance -= amount
11.
12. acc = BankAccount("Aneesh", 500)
13. acc.withdraw(600)
14. print("Balance:", balance)

```

72.

which line has error ? ans : 14

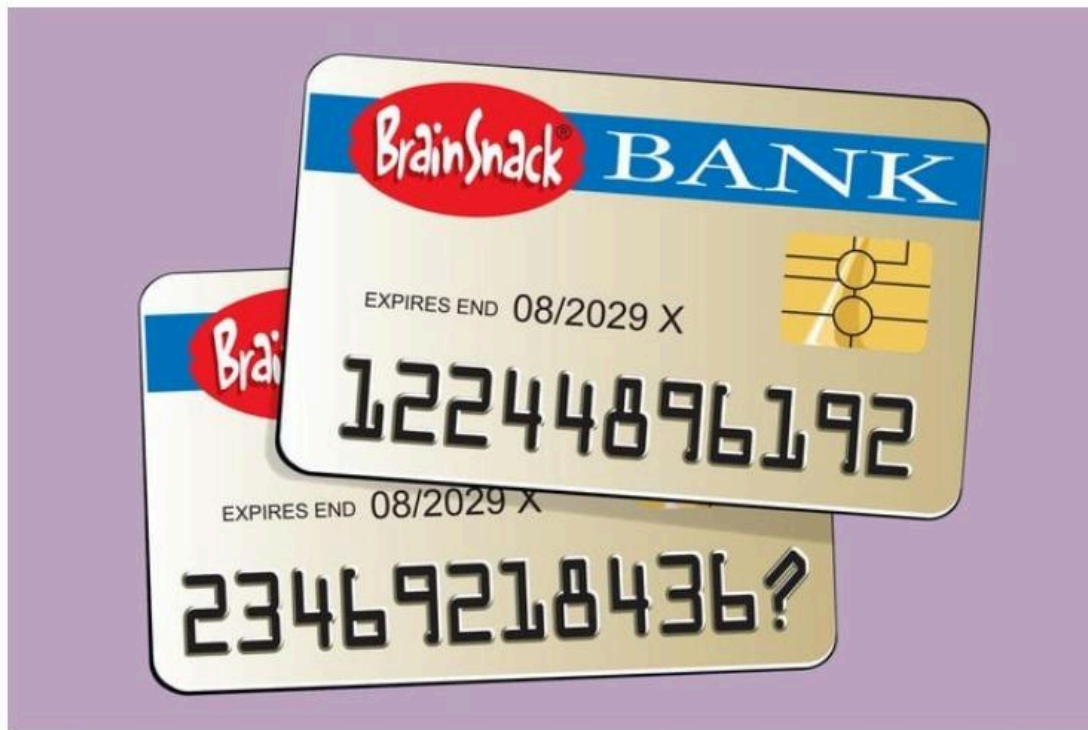

73. The term “bug” in computer science originated when a real insect caused a system malfunction. What insect was it? Answer: Moth

74. What was the first ever message sent over the Internet (ARPANET) in 1969 — only two letters long before the system crashed? Answer: LO (lowercase = lo)

75. Which company’s failed portable music player called “Zune” was meant to compete with the iPod? Answer: Microsoft

76.

Credit rating

BRAINSNACK

Which number is missing on the bottom credit card?

Answer: 8. The number formed by the two first digits is always doubled. 12, 24, 48, 96, 192 on the top card and 23, 46, 92, 184, 368 on the bottom card.

77. In computer storage, what is the term for memory that is non-volatile but allows fast random access, like SSDs? Answer = Flash

78. Which neural network architecture replaces recurrence with self-attention to handle sequential data efficiently? Answer = transformer

79. In cryptography, which algorithm type uses the **same key** for both encryption and decryption? **Answer:** Symmetric

80. I'm named for haste but flourish in reeds,

I swell in crowds and throb in veins,

I crown the hours commuters dread,

And on the field I burst through lanes.

Four letters wear my many masks — what am I?

Ans :rush

81. ONE evening before sunset 2 friends ram and shyam were talking to each other face to face ,if shyam's shadow was exactly to his right side ,which direction was ram facing?

Ans: South

82.

Easter Eggs:

- How many times do we get “real” paneer in the mess? = 0
- [http.cat](http://cat)
- Is Taiwan a country = <https://http.cat/status/102>
